Professional Summary

Flutter Developer with a strong foundation in cross-platform mobile development and a passion for creating clean, efficient, and user-friendly applications. Fast learner, collaborative team member, and highly motivated to grow through hands on experience and continuous learning.

Education

Faculty of Computers and Information Science – Mansoura University
Year : 4th Year **GPA :** Very Good
Expected graduation : 2027

Technical Skills

- **Languages :** Dart, C++, C#
- **Frameworks & Tools :** Flutter, Firebase, Git, GitHub,
- **State Management :** BLoc , Cubit, Provider
- **Local Databases :** SQLite, Hive, Shared Preferences
- **Architecture :** MVVM
- **APIs :** RESTful APIs (using Retrofit & Dio)
- **Concepts :** OOP, Clean Code

Soft Skills

- Problem Solving
- Time Management
- Teamwork & Collaboration
- Adaptability and Flexibility
- Communication Skills
- Self-Learning & Initiative
- Attention to Detail

Activities & Volunteering

Flutter Mentor at CIS Team, Mansoura University (2024-2025)

- Supported junior members in understanding Flutter concepts and solving coding problems.
- Assisted in organizing learning sessions and guiding students through projects and tasks.

Flutter Instructor – Technical Gates 5 (CIS Team) (2024-2025)

- Delivered sessions and mentored students in the Flutter track as part of the Technical Gates 5 program organized by the CIS Team. Helped participants grasp core Flutter concepts and apply them in practical mini-projects.

Head – IEEE Mansoura Computer Society Chapter (Flutter Circle) (2025-2026)

- Actively participated in the Flutter Circle, contributing to discussions, activities, and events related to Flutter development.

Flutter Instructor – BreakinPoint Team (Flutter Bootcamp) (2025)

- Led a 1.5-month Flutter bootcamp, guiding participants from fundamentals to final project development.
- Provided hands on training, follow up, and individual support throughout the camp.

Training

Flutter Developer Intern – Growfet

- Developed and maintained mobile applications using Flutter and Dart.
- Implemented clean and scalable UI following modern design principles.
- Integrated RESTful APIs and managed application state.
- Debugged issues and optimized app performance for better user experience.
- Collaborated within a team using best practices and version control.

Flutter Trainee – Information Technology Institute (ITI) Winter Internship (Jan 2025 – 60 hours)

Completed a practical Flutter training covering essential topics such as:

- Flutter Widgets and UI Design
- API Integration and data handling
- State Management techniques
- Introduction to Freelancing and real-world project planning

Digital Egypt Pioneers Initiative (DEPI) (Jun 2025)

- Technical Track: Studying the Cross Platform track using Flutter, focusing on building scalable, multi-platform mobile applications.
- Non-Technical Track: Participating in sessions on soft skills, freelancing basics, communication, and career development.

PROJECTS

Qoot App _ Food Donation App

- Developed the complete Charity module for the Qoot food-donation application using Flutter and Bloc/Cubit architecture. Implemented core functionalities including viewing available donations, reservation workflows, donation details, charity profile management, and responsive UI/UX screens. Worked with Clean Architecture principles, REST APIs, Dependency Injection, and state management to build a scalable and maintainable solution. Collaborated within a multidisciplinary DEPI team to deliver a real-world application focused on reducing food waste and supporting charitable organizations.
- **GitHub Repository:** https://github.com/theahmedhany/qoot

Sanad Application | Flutter Project

- Developed a mobile application that connects clients with lawyers for legal consultations and case representation through an easy and user-friendly platform. The application allows users to browse lawyers based on experience, education, pricing, and client reviews, view detailed lawyer profiles, and communicate seamlessly with legal professionals. It also includes an AI-powered chatbot to assist users and support lawyers in analyzing cases and finding similar legal references.

Rafeeq Application | Flutter Project

- Developed a mobile application that connects founders with investors to support startup ideas and funding opportunities through a simple and interactive platform. The application enables founders to showcase their projects and allows investors to browse, filter, and discover startup ideas based on different interests and criteria. It also enhances communication and interaction between both sides to create a smoother investment and collaboration experience.
